Re: ACS CAN's Comments on Proposed 1332 Waiver

Dear Administrator Verma:

The American Cancer Society Cancer Action Network (ACS CAN) appreciates the opportunity to comment on the State of New Hampshire's 1332 State Innovation Waiver Application. ACS CAN is making cancer a top priority for public officials and candidates at the federal, state and local levels. ACS CAN empowers advocates across the country to make their voices heard and influence evidence-based public policy change as well as legislative and regulatory solutions that will reduce the cancer burden. As the American Cancer Society's nonprofit, nonpartisan advocacy affiliate, ACS CAN is critical to the fight for a world without cancer.

ACS CAN supports a robust marketplace from which consumers can choose a health plan that best meets their needs. Access to health care coverage is paramount for persons with cancer and survivors. Research from the American Cancer Society has shown that uninsured Americans are less likely to get screened for cancer and thus are more likely to have their cancer diagnosed at an advanced stage when survival is less likely and the cost of care more expensive.¹ In the United States, more than 1.8 million Americans will be diagnosed with cancer this year – an estimated 8,060 in New Hampshire.² An additional 16.9 million Americans are living with a history of cancer – 84,080 in New Hampshire.³ For these Americans access to affordable health insurance is a matter of life or death.

ACS CAN supports New Hampshire's proposed reinsurance program. A well-designed reinsurance program can help to lower premiums and mitigate plan risk associated with high-cost enrollees. The Department's application states that the reinsurance program is expected to

³ American Cancer Society. Cancer Treatment & Survivorship Facts & Figures 2019-2021. Atlanta: American Cancer Society, 2019.

reduce premiums by 16 percent for the 2021 plan year.⁴ These savings could reduce federal subsidy payments, and lower premiums for consumers not eligible for subsidies who enroll in coverage through the exchange.

A reinsurance program may encourage insurance carriers to continue offering plans through the exchange or begin to offer plans. The expected maintenance or increase in plan competition due to the reinsurance program also may help to keep premiums from rising. These premium savings could help cancer patients and survivors afford health insurance coverage and may allow some individuals to enroll who previously could not afford coverage. The Department notes that there has been a steady decline in the rate of unsubsidized enrollees in New Hampshire's individual market.⁵ The Department expects that enrollment in the individual market could increase by 6 percent because of the reinsurance program.⁶

We are pleased that the application states that "The waiver does not make alterations to the required scope of benefits offered in the individual health insurance market in New Hampshire and, therefore, would provide access to coverage that is as comprehensive as absent the waiver."⁷ ACS CAN believes that patient protections in current law – including those mentioned here – are crucial to making the healthcare system work for cancer patients and survivors.

Conclusion

On behalf of the American Cancer Society Cancer Action Network, we thank you for the opportunity to comment on the proposed section 1332 waiver, which we believe will provide long-term viability of the individual market while not eroding important consumer protections. If you have any questions, please feel free to contact Jennifer Hoque, Senior Policy Analyst, at Jennifer.Hoque@cancer.org.

Sincerely,
