

Just the Facts

Where Health Care Dollars are Spent

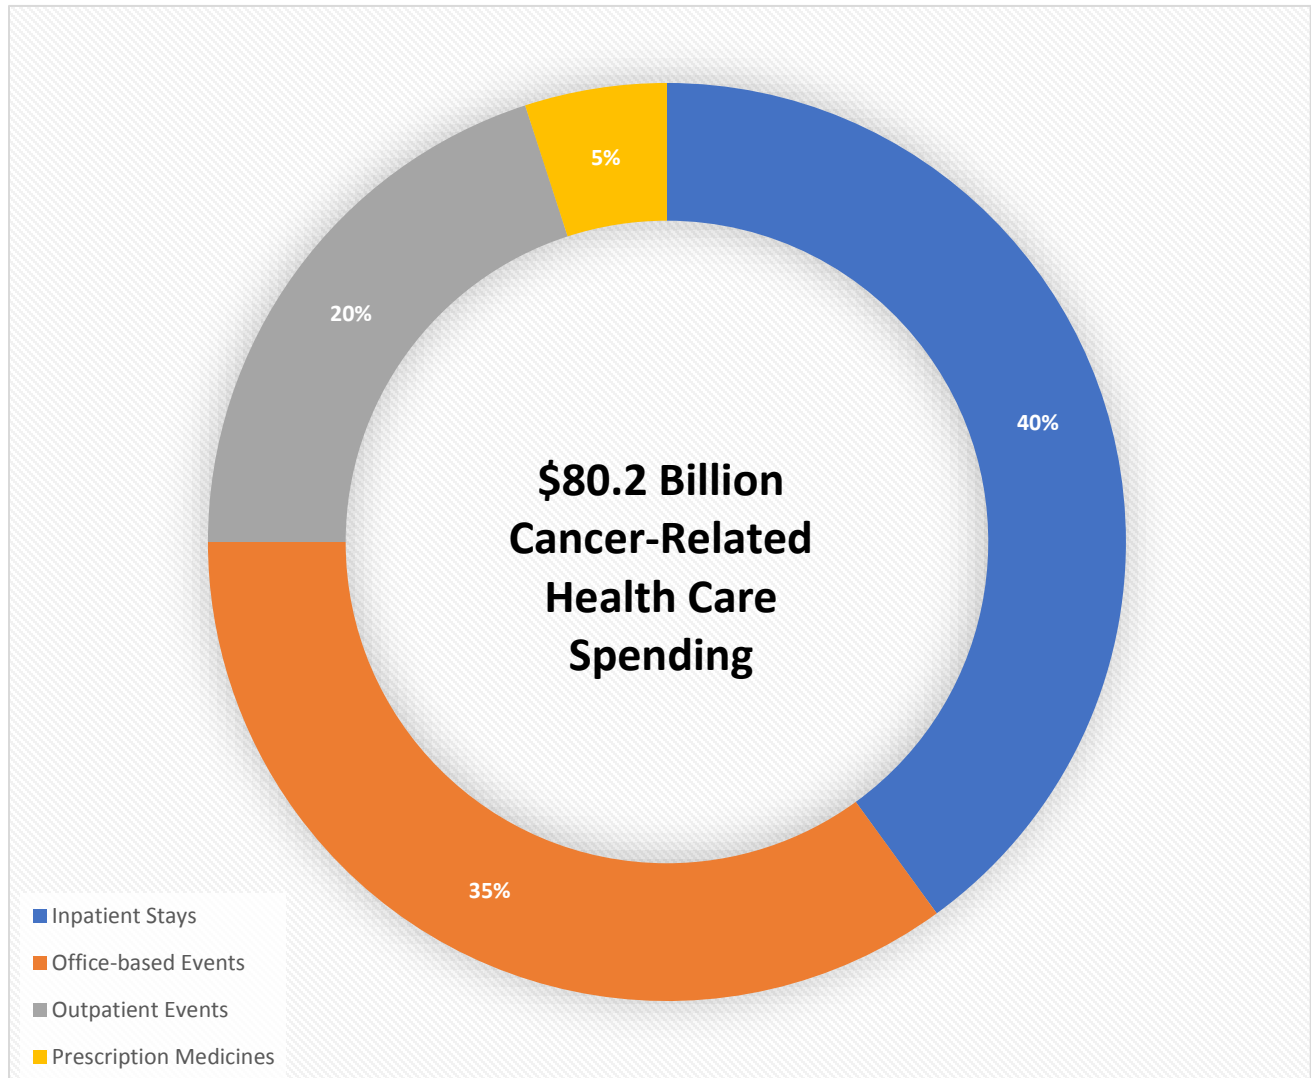

In 2015 the U.S. spent \$1.6 trillion on health care.

Note: the 'prescription medicines' category includes drugs purchased by the patient at a pharmacy (or via mail order). Many other spending categories in this graph include some costs for drugs that are administered in hospitals or in doctor's offices.

In 2015, the U.S. spent \$80.2 billion on cancer-related health care – nearly \$4 billion of which was spent by patients out-of-pocket.

Note: the 'prescription medicines' category includes drugs purchased by the patient at a pharmacy (or via mail order). The other spending categories in this graph include some costs for drugs that are administered in hospitals or in doctor's offices – like intravenous chemotherapy treatment.
