

**ONE STEP
FOR
MAN.**

**ONE GIANT
LEAP FOR
MANKIND.**

**CONQUERING CANCER IS THE
NEXT GREAT FRONTIER.**

Eliminating death and suffering from this disease means everything to the millions of Americans with cancer and the people who love them. That's why we pushed for and secured a large increase in federal research funding last year. Now with the Moonshot Initiative before us, we're refueling our effort and urging Congress to boost funding again to drive discoveries. We won't rest until the mission is completed—because everyone is just one degree from cancer.
