

Rx WHEN YOU LIMIT DRUG THERAPIES, YOU THREATEN LIVES.

Every patient is different. A drug therapy that works for one may not work for another. That's why for more than a decade, Medicare beneficiaries have had access to cutting-edge FDA-approved therapies included in the "six protected classes" to treat their cancer, organ transplants, epilepsy, HIV/AIDS and mental illness. Our patients know this policy works and it saves lives. But a proposal from the administration could interfere with what doctors think is the best course of treatment for their patients and if finalized, could delay patients' access to lifesaving innovative therapies. It's wrong and it will put patients' lives at risk.

USE AS DIRECTED.

Tell Secretary Azar and Congress: Protect patients' lives and stop the proposed changes to Medicare Part D's Six Protected Classes. Don't delay access to lifesaving medicines for patients living with cancer, organ transplants, epilepsy, HIV/AIDS or mental illness.
