FAIRNESS AND BUSINESS
How a simple change in insurance policy can impact your business.

HOME SICK
In 2015 a report from the CDC Foundation showed that businesses annually lose $225.8 Billion due to illness. That’s $1685 a year and $4.62 a day per person. (1)

CANCER DOESN’T HAVE TO KEEP YOU FROM WORK
Advancements in cancer treatments today for some cancers are now in a pill form. Patients take these oral medications and continue on with their lives, continuing to work and enjoy their family times.

PAYMENTS ARE NOT THE PROBLEM
One would assume that premiums would rise if oral anticancer fairness was required, yet several states who have implemented this policy have seen little to no change in premium like Illinois, where they had no impact to their premiums. (2)

FAIRNESS IS GOOD FOR BUSINESS
Policies that allow for fairness for cancer treatments allow for workers to continue to work, keeping schedules and deadlines intact. It is good business for all business to support Oral Chemotherapy Fairness.
