

# WHERE YOU LIVE SHOULD NOT DETERMINE IF YOU LIVE

90% of cervical cancer deaths occur in low- and middle-income countries (LMICs).

More than 750 women die from cervical cancer every day in LMICs. These deaths are preventable.

CERVICAL CANCER IS A GLOBAL HEALTH CRISIS

Cervical cancer is the leading cause of cancer death for women in 42 countries.

WE CAN ELIMINATE CERVICAL CANCER DEATH WORLDWIDE!

CONGRESS CAN HELP END THESE NEEDLESS DEATHS. BUT THEY NEED TO HEAR FROM YOU.

## VACCINATIONS & SCREENINGS ARE NECESSARY

Cervical cancer is preventable and treatable through the HPV vaccine and routine screening

The World Health Organization (WHO) says the HPV vaccination is the MOST cost-effective measure against cervical cancer at **\$4.50 per dose** in LMICs

More than 270M doses have been given since 2006 with **NO** serious adverse impacts.

Screenings can be performed in low-resource settings using basic methods
