### What's the difference?

House Bill 4354 will help Michiganders

#### Coverage vs. Access

<table>

</table>
| Services purchased by individuals or businesses to provide health coverage.  
House Bill 4354 would apply, lowering the costs for patients to access oral anti-cancer medications  
Other states that have passed this law report, at most, a negligible impact on premiums.  
Illinois, a state similar to Michigan, saw no impacts on their premiums with this policy. | Self funded plans are funded through the organization providing the coverage, paying for the services themselves.  
This legislation would not affect these plans.  
These plans are federally controlled.  
Efforts are being made federally to provide the same protections. | Medicare is a federally controlled health plan.  
This legislation would not affect Medicare. | Medicaid is a state and federally controlled health plan.  
Medicaid has cost restrictions for patients ensuring that there is a low cost share for patients.  
This legislation does not affect Medicaid patients. |
