

# Protect Cancer Cures

- Millions of cancer patients and survivors are alive today thanks to cancer research.
- Progress depends on consistent increased federal funding for cancer research.
- There could be about 171,000 new cancer cases and nearly 51,000 cancer deaths among LGBTQ+ people in 2026.
- We can't afford to lose momentum in finding cures for cancer.

**Sign the petition now to tell Congress to reject any proposed cuts to cancer research funding and support the highest possible funding for cancer research to help end cancer as we know it, for everyone!**

**TEXT PRIDE to
