COVER

Una corte federal ha dictaminado que Philip Morris USA, R.J. Reynolds Tobacco, Lorillard, y Altria de forma deliberada engañaron al público estadounidense al diseñar cigarrillos que intensifiquen el suministro de nicotina, y ha ordenado a esas compañías hacer esta declaración. Esta es la verdad.

- Philip Morris USA, R.J. Reynolds Tobacco, Lorillard, y Altria demandadas diseñaron de manera intencional cigarrillos para hacerlos más adictivos.
- Las compañías tabacaleras controlan el impacto y el suministro de nicotina de muchas maneras, incluso en el diseño de filtros y en la selección del papel para cigarrillos con el fin de acrecentar al máximo la ingestión de nicotina, en la adición de amoníaco para hacer menos áspero el sabor de los cigarrillos; y en el control de la composición física y química de la mezcla de tabaco.
- Cuando usted fuma, la nicotina provoca cambios en el cerebro – por eso es tan difícil dejar de fumar.

A Federal Court has ruled that Philip Morris USA, R.J. Reynolds Tobacco, Lorillard, and Altria deliberately deceived the American public about designing cigarettes to enhance the delivery of nicotine, and has ordered those companies to make this statement.

Here is the truth. ▶

OUTSIDE

Here is the truth

- Philip Morris USA, R.J. Reynolds Tobacco, Lorillard, and Altria intentionally designed cigarettes to make them more addictive.
- Cigarette companies control the impact and delivery of nicotine in many ways, including designing filters and selecting cigarette paper to maximize the ingestion of nicotine, adding ammonia to make the cigarette taste less harsh, and controlling the physical and chemical make-up of the tobacco blend.
- When you smoke, the nicotine actually changes the brain - that's why quitting is so hard.
