GET INVOLVED

Local, State and National Levels

Volunteer with ACS CAN. Make an impact.

Your voice and your story is what distinguishes you from a statistic or a policy. It also puts a human face on a disease that impacts millions of Americans every year.

Your lawmakers and community-level decision makers are overwhelmed with numbers and studies. They need to hear why these policies are important and hear stories about people – real people in their community or district. People like you.

**Join ACS CAN to begin advocating for prevention,
support services and continued cancer care**
